

Enriching Lives Through Education

ABOUT LAKELAND COLLEGE

At Lakeland College, students take charge of their future and become leaders today through career-relevant, industry-driven programming and experiential learning opportunities. Students take the lead through student-managed enterprises, events and experiences. For example, they put theory into action on the Student-Managed Farm – Powered by New Holland, battle realistic fire simulations at the Emergency Training Centre, run an award-winning play program for children, rebuild cars, manage a campus spa and salon, and more! Lakeland offers 50-plus programs and serves more than 7,000 credit and non-credit students every year at our campuses in Vermilion and Lloydminster, and through online and off-site delivery.

APPLIED RESEARCH

As a college with a hands-on focus, Lakeland students are sure to “take the lead.” But learning by experience at Lakeland goes much deeper than hands-on classes. The college is committed to pursuing applied research and innovation opportunities that enhance both teaching and learning and support regional economic development. The focus of applied research is primarily in the areas of agriculture, energy and environment. Our Research Centre and G.N. Sweet Livestock Research Facility at the Vermilion campus are test-beds for innovations in integrated renewable energy systems, bioenergy, livestock research and crop research.

PROGRAMS

Lakeland awards certificates, diplomas and applied degrees, offers pre-employment and apprenticeship trades programming, and delivers undergraduate degree courses and programs in collaboration with degree-granting institutions. Full-time, part-time, online and continuing education studies are available. Lakeland offers programming in the areas of agricultural sciences, business, energy, environmental sciences, fire and emergency services, health and wellness, human services, interior design technology, trades and technology and university transfer.

FUTURE FOCUSED

Innovating in teaching and learning is a priority for Lakeland. To continue this work, Lakeland has been building on its foundation to produce modern learning environments. New facilities include:

Vermilion

Dairy Learning Centre

The centre features state-of-the-art technology in robotic and conventional milking and feeding systems.

Animal Health Clinic

The new facility is equipped with canine and feline SynDaver models, realistic equine models, a direct digital radiography x-ray system, a bovine ultrasound machine with BCF universal goggle, and more.

G.N. Sweet Livestock Research Facility

Students and staff participate in research projects of importance to the agriculture industry in this modernized facility. GrowSafe technology is used to monitor the individual feed intake of animals.

Lloydminster

Hairstyling Salon

The salon features 24 styling stations, a reception area with retail station, and an adjacent colour room for mixing professional products. Students are able to work with real clients and practice what they've learned in class.

Energy Centre

Opened in 2015, the Energy Centre at the Lloydminster campus is one of the most innovative post-secondary training facilities in Western Canada.

Energy Park Site

The three-acre industrial site just west of Lloydminster includes two large buildings that now house Lakeland's street rod technologies and truck driver training programs. Lakeland acquired the Energy Park Site through the generosity of a donor.

Creating Opportunity in the Alberta HUB

GO RUSTLERS!

Lakeland has competitive basketball, cross-country running, curling, futsal, rodeo, rowing, soccer and volleyball teams. Rustlers Athletics measure success through three Cs: classroom, competition and community. The Rustlers women's volleyball team is the 2017 CCAA Women's Volleyball National Champions, 2018 CCAA Women's Volleyball Bronze Medalists, and the 2017 and 2018 ACAC Women's Volleyball Champions. The Rustlers men's basketball team is the ACAC Men's Basketball Silver Medalists.

COMMUNITY PARTNERS

Through its services and facilities at its campuses in Vermilion and Lloydminster, Lakeland helps support the recreational, cultural, fitness, and conferencing needs of the communities it serves. Lakeland has numerous specialized facilities such as two community performing arts theatres, two recreation centres, a swimming pool, and an Equine Centre that are often the site of community events and activities.

2018 AWARD-WINNING RESULTS

From individual student and employee accolades to college-wide awards, Lakeland is proud of these recent accomplishments:

- Top Alberta Apprentice Award – Kirby Beloin, parts technician
- NKBA Student Design Competition – Interior design student Mandy Davediuk and Mackenzie Dieleman earned second- and third-place finishes
- Lakeland named one of Alberta's Top 70 Employers
- Gold Award of Excellence (Staff – Managerial) from Colleges and Institutes Canada – presented to Josie Van Lent, dean of the School of Agricultural Sciences
- Alberta Farm Animal Care's Award of Distinction for Industry Leadership

Lakeland College Campus Locations

The Alberta HUB region is proud of its exemplary educational system and options available to its residents. From numerous elementary, secondary and post-secondary educational institutions, the region's schools strive to encapsulate the diverse cultures and beliefs of its communities.

There are three top-notch colleges in the Alberta HUB region: Lakeland College, Portage College, and Blue Quills First Nations College; all with comprehensive programs to ensure our younger generation have the tools to develop their education and future careers. In fact, the colleges boast higher qualification levels in several graduate programs than the rest of the province.

For more information on these colleges and how they are contributing to sustainable communities and world-class research, visit Albertahub.com, Lakelandcollege.ca, Portagecollege.ca, or Bluequills.ca.
